No.	Title	Journal	Published
1	Evaluation of Serum CTRP-4 and CTRP-12 Levels in Hashimoto's Thyroiditis Patients: A Comparative Analysis with a Control Group and Their Correlation with Biochemical Factors	Iranian Journal of Pathology	2025
2	Determination of the Serum Values of C1q/TNF-related Proteins 9 and 12 in Colorectal Cancer Patients and Comparison with the Healthy Control Group	International Journal of Cancer Management	2025
3	Evaluation of the serum level of CTRP-3 and CTRP-6 in patients with Hashimoto's disease and correlation with thyroid hormones and lipid profile	Journal of Basic and Clinical Physiology and Pharmacology	2025
4	Overexpression of adenosine receptor (A1, A2a, A2b, A3) genes in esophageal tumor tissue: A2b adenosine receptor as a potential biomarker and anticancer target	Journal of Applied Genetics	2025
5	Expression Changes in the Fibulin Family in Gastric Cancer: A Systematic Review	Medical Laboratory Journal	2025
6	Cardiac Toxicity Under Concurrent Administration of Trastuzumab (Anti-HER2 Therapy) and Radiotherapy: Systematic Review and Meta-Analysis	Health Science Reports	2025
7	SOX2OT inhibition enhances the choline O-Acetyltransferase gene expression in neuronal differentiation model of NT2 cells	Tissue and Cell	2025
8	Hyperglycemia correlated with elevated circulating aminoacylase 1 in patients with pre-diabetes and type 2 diabetes	Journal of Diabetes & Metabolic Disorders	2025
9	Repurposing FDA-approved drugs to find a novel inhibitor of alpha-ketoglutarate-dependent dioxygenase FTO to treat esophageal cancer	Research in Pharmaceutical Sciences	2025
10	Serum Shock Enhances Endogenous Melatonin Production and Mitochondrial Gene Regulation in U87-MG Glioblastoma Cells	OBM Genetics	2025
11	Synthesis, characterization, and evaluation of copper-doped zinc oxide nanoparticles anticancer effects: in vitro and in vivo experiments	BMC Cancer	2025
12	Oral health and the risk of head and neck squamous cell carcinoma: a multicenter case-control study in Iran	Scientific Reports	2025
13	Combined Metformin and Baricitinib Therapy Attenuates Inflammation in STZ-Induced Diabetic Rats via AMPK/JAK-STAT Pathway Crosstalk	Endocrinology, Diabetes & Metabolism	2025
14	Association of different vitamin D levels with metabolic syndrome components in type 2 diabetic patients in Gorgan	Romanian Journal of Diabetes, Nutrition and Metabolic Diseases	2025
15	Elevated Serum Levels of CTRP-6 and Asprosin in Systemic Lupus Erythematosus: Association with Oxidative Stress Markers and Clinical Manifestations	Iranian Journal of Immunology	2025

16	Comparison of Fibrillin-1 and Fibrillin-2 Gene Expression Level in Esophageal Squamous Cell Carcinoma Tumor Tissue and Tumor Margin Tissue	Iranian Journal of Medical Sciences	**2025**
17	Evaluation of the serum level of CTRP-3 and CTRP-6 in patients with Hashimoto's disease and correlation with thyroid hormones and lipid profile	Journal of Basic and Clinical Physiology and Pharmacology	**2025**
18	Overexpression of adenosine receptor (A1, A2a, A2b, A3) genes in esophageal tumor tissue: A2b adenosine receptor as a potential biomarker and anticancer target	Journal of Applied Genetics	**2025**
19	Elevated Serum Levels of CTRP-6 and Asprosin in Systemic Lupus Erythematosus: Association with Oxidative Stress Markers and Clinical Manifestations	Iranian Journal of Immunology	**2025**
20	Comparison of asprosin and vaspin serum levels in coronary artery disease patients before and after coronary artery bypass graft surgery	Journal of Diabetes & Metabolic Disorders	**2025**
21	The effect of cigarette smoking on serum homocysteine, folic acid, and vitamin B12 concentrations in patients with cardiovascular diseases	Medical Laboratory Journal	**2025**
22	Boosting triterpene production in cell suspension culrures of Betula pendula Roth: the role of endophytic and basidiomycete fungi isolated from birch trees	World Journal of Microbiology and Biotechnology	**2025**
23	Elevated oxytocin levels and oxytocin receptor gene expression in female-to-male transgender individuals	Scientific Reports	**2025**
24	Identification of Key Oligonucleotide Fragments in the Hepatitis C Virus Genome in Evasion of Interferon Mechanisms Using Weighting Algorithms	Medical Informatics Resaerch Center-Kerman University of Medical Sciences	**2025**
25	Upregulation of miR-206 attenuates breast cancer cell survival and increases their radiosensitivity	International Journal of Radiation Biology	**2025**
26	Efficacy of diabetes nutrition counseling on metabolic factors, knowledge, attitude, and practice	International Journal of Healthcare Management and Development	**2025**
